

# Machine Learning for "Big Data" in Biomedicine

**Yanjun (Jane) Qi, PhD**  
**Department of Computer Science,**  
**University of Virginia**

---

**2016.09.16**

# Machine Learning is Changing the World

How may I help you,  
**human?**

**Apple Siri / Amazon Echo**

9/16/16

**IBM WATSON**

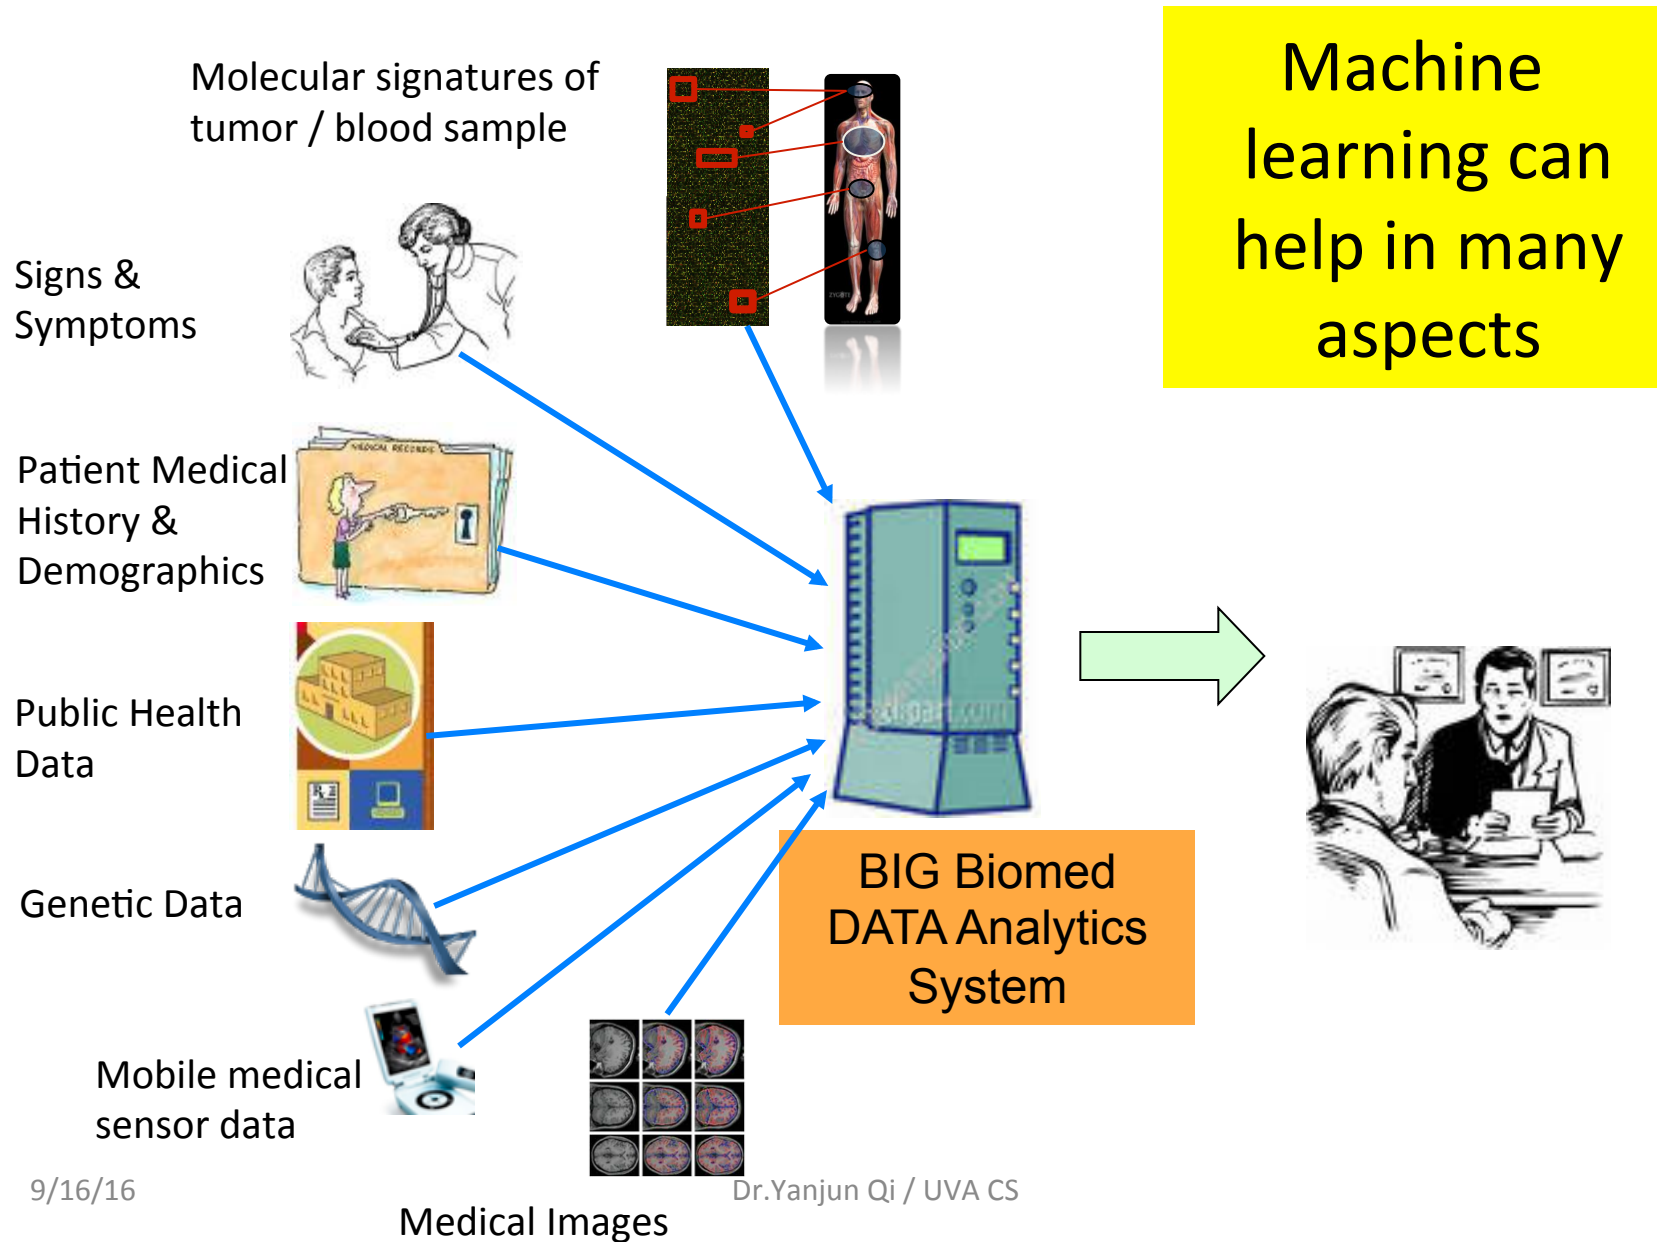

Dr. Yanjun Qi / UIVA CS  
**Control learning**

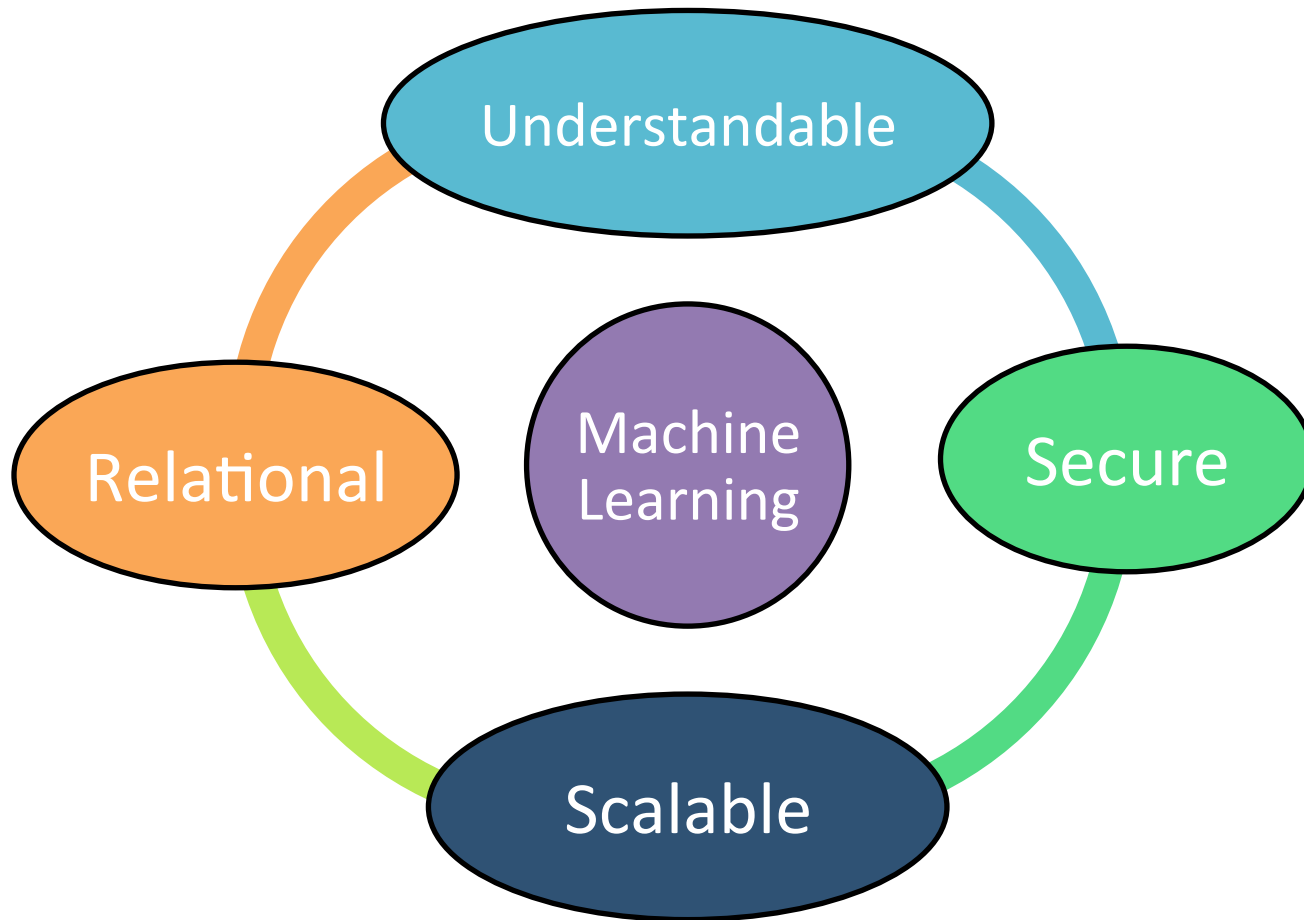

**Object recognition**

**Many more !**

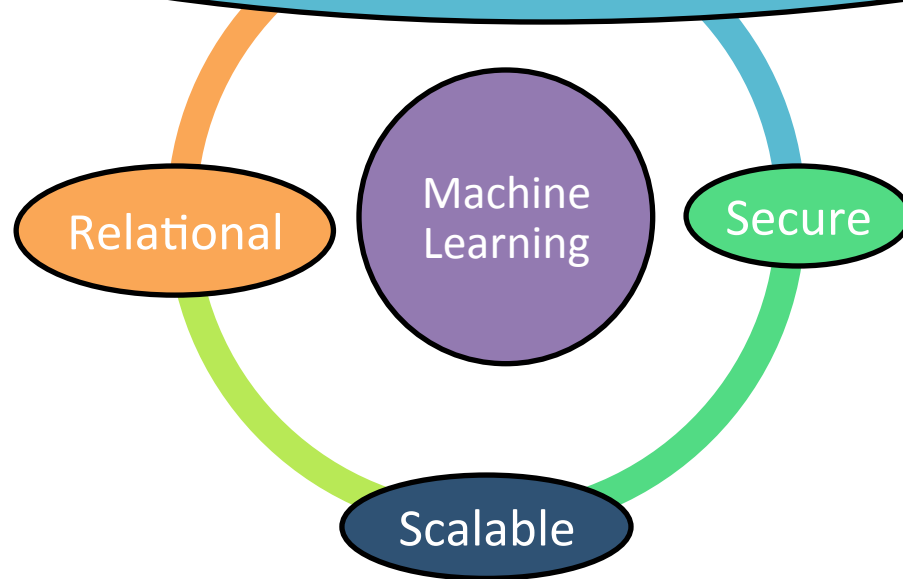

# Big and Complex Data in Biomedicine

# Machine Learning for Mining “Big & Complex” Data in Biomedicine

# 1. Understandable: Opening Up the “Black Box” of machine learning models

# 1. Understandable: Opening Up the “Black Box” of machine learning models

- Deep Genomic Dashboard: Visualizing and Understanding Genomic Sequences Through Deep Neural Networks

2. Relational:  
Effectively  
translate  
aggregated data  
into knowledge  
that take the  
form of graphs

Understandable:

Machine  
Learning

Secure

Scalable

## 2. Relational:

Effectively translate aggregated data into knowledge that take the form of graphs

data

Inference

graph

# Joint Inference of Multiple Related Graphs from Heterogeneous Data

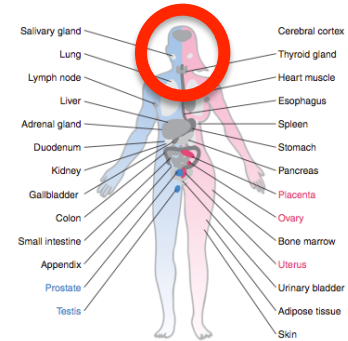

Multi-Context

Brain Cancer

Lung Cancer

Normal Brain Tissue

Expression Data

$$(X_1^{(1)}, \dots, X_{n_1}^{(1)}), X_i^{(1)} \in \mathbb{R}^p$$

$$(X_1^{(2)}, \dots, X_{n_2}^{(2)}), X_i^{(2)} \in \mathbb{R}^p$$

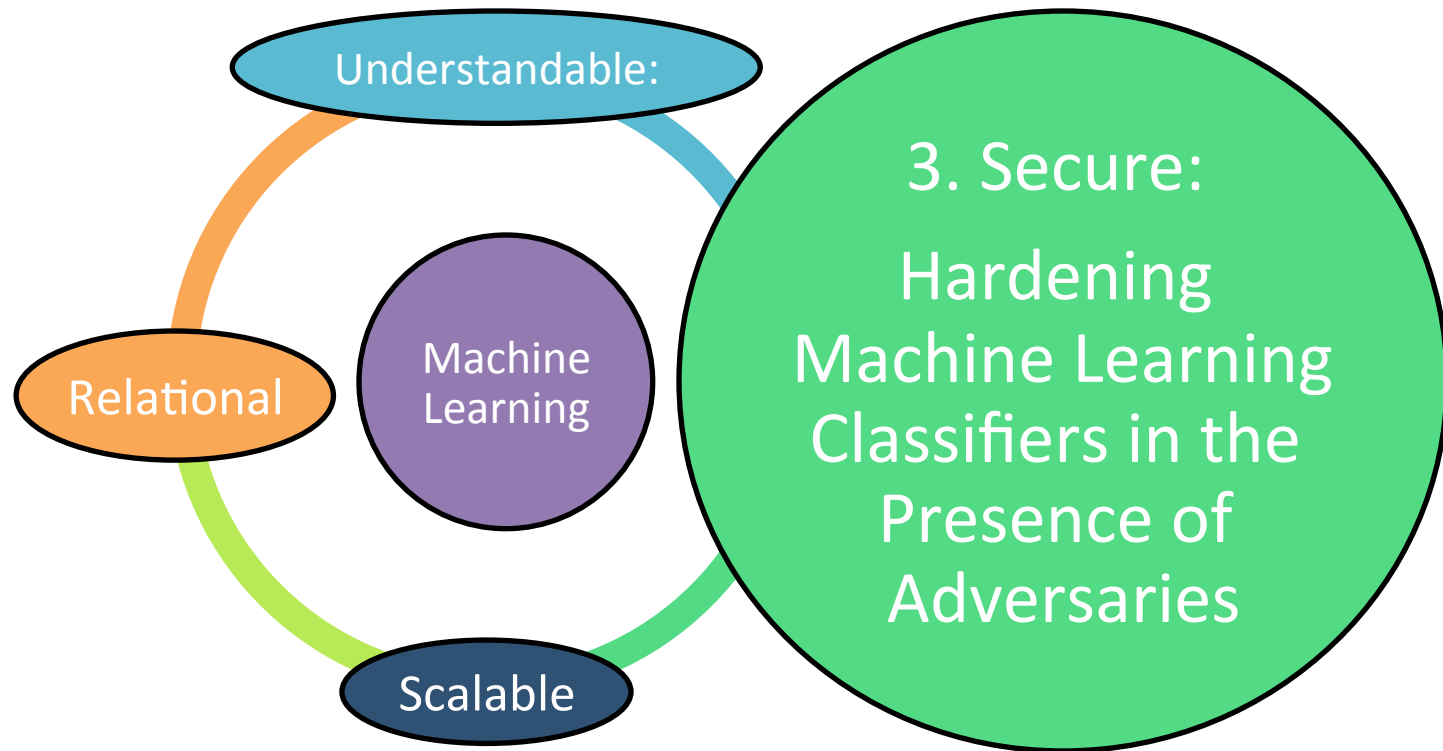

$$(X_1^{(3)}, \dots, X_{n_3}^{(3)}), X_i^{(3)} \in \mathbb{R}^p$$

Inference

Network Inference

### 3. Secure:

## Hardening Machine Learning Classifiers in the Presence of Adversaries

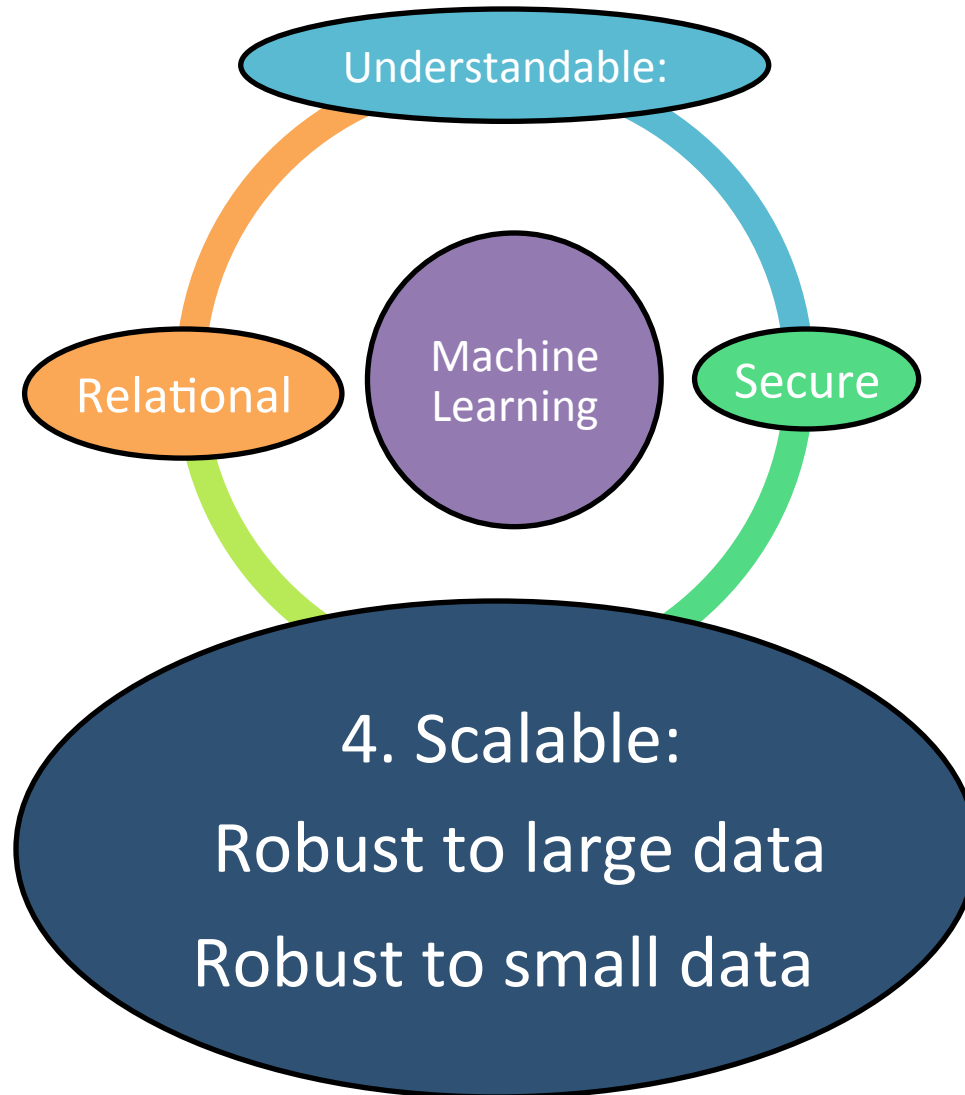

- Automatically Evading Classifiers

The presence of **adversary**, with evolving evasion attacks.

Goal: Understand how ML models work under attack.

Results: Powerful machine learning models are **vulnerable**.

## 4. Scalable:

Robust to large data

Robust to small data

- **MUST-CNN: A Multilayer Shift-and-Stitch Deep Convolutional Architecture for Sequence-based Input Output Prediction**
  - Speed is key - predictions for half million samples in under two seconds
